PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning graduate with strong Python programming and software development experience. Skilled in building scalable applications, developing machine learning models, and working with virtualized environments for secure system development. Proficient in Python, SQL, and software development practices, with experience in data processing and distributed system environments. Seeking an entry-level Software Developer role to build efficient and scalable software solutions.

SKILLS

- **Programming Languages:** Python
- **Software Development:** Software Development, Virtual Environments, Distributed Systems
- **Data Processing:** Pandas, NumPy, Data Cleaning, Data Preprocessing
- **Machine Learning:** Regression, Classification, Gradient Boosting, Model Evaluation, Feature Engineering
- **Databases:** SQL
- **Visualization Tools:** Tableau, Power BI, Matplotlib, Seaborn

INTERNSHIP

- **Software Development Intern (Appzera)** *March 2025 - June 2025*
Designed and implemented a three-machine virtual architecture (2 clients + 1 server) using virtualization to support secure and scalable software development and testing environments.
- **AI & ML Internship (InLustro)** *June 2023*
Applied data preprocessing, cleaning, and feature engineering techniques to enhance machine learning model training efficiency and improve predictive insights.

EDUCATION

Bachelor of Engineering (Artificial Intelligence and Machine Learning)

Bangalore Institute of Technology

2021 - 2025

CGPA - 7.38/10

Class 12th - STATE

S.G.P.T.A Pre-University

2019 - 2021

Percentage - 75%

Class 10th - STATE

Auden Public School

2010 - 2019

Percentage - 85.67%

PROJECTS

Deloitte Data Analytics Job Simulation – Forage

Feb 2026

- Analyzed industrial telemetry datasets to identify machine downtime patterns.
- Developed interactive Tableau dashboards to analyze industrial telemetry datasets and visualize machine downtime patterns for operational insights.
- Performed Excel-based data analysis to evaluate gender pay equity patterns and generate actionable business insights.

Early Drug Discovery

Oct 2024 - Jan 2025

- Developed a machine learning model using molecular property datasets to predict potential drug candidates in early drug discovery.
- Applied data preprocessing and feature selection techniques to enhance prediction accuracy in computational drug screening models.

ACHIEVEMENTS

- Core Member & Technical Lead - Samskruthi Club
- Joint Secretary & Treasurer - Sports Club
- Represented college in VTU cricket tournaments as an All-rounder

CERTIFICATIONS

- Appzera Certification - Software Development using Federated Learning
- Research Paper Publication (IJERT): Early Drug Discovery: Target Identification, Screening and Optimization using GCN
- Deloitte Data Analytics Job Simulation – Forage

Languages: English (Fluent), Kannada (Native), and Hindi (Conversational)
